

QUALITY & DEPENDABILITY IN MINING OPERATIONS

Mining applications can be hard on the equipment. Abrasive, corrosive, erosive — all those conditions apply in varying proportions. So it can come as a relief to know that FluoroSeal® Non-Lubricated Plug Valves, both Sleeved and Lined, can handle even the hardest of condition combinations, in a variety of mining operations:

- Alumina Refineries
- Bauxite
- Carbon Strips
- Copper
- Cyanide
- Gold
- Lime Slurry
- Nickel
- Phosphoric Acid
- Sulfuric Acid

A STANDARD YOU CAN RELY ON

FluoroSeal® standard valves are inherently cavity-free, provide a bubble tight shutoff and prevent particle accumulation, rendering them ideal for the mining industry. Two-way or multiport, offered in a wide variety of materials and special alloys, FluoroSeal® Plug Valves can be customized to optimize life span and performance in your particular medium. FluoroSeal® valves conform to the following international standards:

API 596
ASME B16.10
ISO/FDI 10497

API 599
ASME B16.34
MSS SP-55

ASME B16.5
ASTM F1545-97
MSS SP-61

DESIGN FEATURES

- Bi-directional in-line and multiple external bubble-tight seals independent of line pressure
- Direct mechanical three-point adjustment or a single point frontal EZ-SEAL® (patented) Top Seal & Adjustment System
- Independent travel stops
- Full encapsulation and retention of all leading edges of polymer sleeve and top seal components
- Full lip at port openings protects the polymer sleeve
- Contoured waterway ensures minimum flow turbulence characteristic
- No body cavities to entrap flow media
- Positive flow direction indication
- Lined valves offer additional corrosion resistance through the use of a virgin, unpigmented PFA transfer molded lining

FluoroSeal® Plug Valves in Mining Applications

MINING-ANSI-R002-2012-5

CAVITY-FREE DESIGN

By design, FluoroSeal® Sleeved and Lined Plug Valves are cavity-free both in open and closed positions.

- No particle accumulation
- Ideal for corrosive and slurry applications

OPTIONS AND SPECIALS: CUSTOM FLOW CONTROL SOLUTIONS

At FluoroSeal Inc. we pride ourselves in the quality of our product, but furthermore we strive to provide each client with a solution pertinent to a particular application. Some of the options and special configurations available on Sleeved and Lined Plug Valves and appropriate for the mining industry are:

- Severe Service (FE)
- Caged Control
- Special Cleaning
- Fire Safe
- HF Alkylation
- EZ-SEAL® (patented) Top Seal & Adjustment System
- Partial and Full Jacket
- V-Port & Characterized Plugs

A GROWING LIST OF SATISFIED CUSTOMERS
